NDMCS Core Dataset N
NDTMS Date Sequence Timeline

Healthcare Assessment Date
- Expected to be done after Triage Date and as part of an overall comprehensive assessment process, i.e., not at the Modality Start Date, as we would question whether there would be sufficient time to conduct a thorough and comprehensive assessment process at the first treatment appointment.
- Date at which the care coordinator is satisfied that initial HCA is completed.

Referral date
- Date referral arrives at agency.
- Expected to be same as or after Date Referred to Modality.

Date Referred to Modality
- For the first modality of treatment within an episode this should be considered as a date referred to Treatment Service. This is expected to be earlier than or the same as the referral date.
- For modalities after the first within an episode it is the date the key worker agreed with the client that they were to have this treatment.

Care Plan Start Date
- Expected to be same as or after the Triage/Initial Presentation date.
- Expected to be same as or before Modality Start Date.
- Can, in certain circumstances, be after Modality Start.
- However, expected to be BEFORE Modality End and Discharge Date.

First Appointment Offered Date for Modality
- Expected to be the same as or after Triage/Initial Presentation Date.
- Not Expected to be after Modality Start Date.

Modality Start Date
- Expected to be same as or after the Triage/Initial Presentation date and first appointment offered date for modality.
- Complete the setting that the intervention is delivered in, if it is different to your agency's default setting.

Modality End Date
- Expected to be after the Modality Start Date.
- Can be same as Modality Start Date.

Discharge Date
- Expected to be the latest date in this sequence.
- Can be the same as or after Modality End Date.

Triage/Initial Presentation Date
- Expected to be the same as or after the Referral date.
